## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16, drawn to a linerless metallic closure, classified in class 215, subclass 327.
  - II. Claims 17-30, drawn to a method for manufacturing a linerless metallic closure, classified in class 53, subclass 486.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, for example, applying a foaming material layer to a surface of a metallic sheet, forming a closure from the metallic sheet having the foam material layer, applying a coat of varnish to the metallic sheet after applying the foam material layer, and wherein curing the foaming material layer in the atmosphere environment.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3727

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
